

# The Joint Professional Practice Model (JPPM)

## The Five Components:

Healthy Work Environment

Quality and Safety

Leadership Development

Evidence-Based Practice

Operational Readiness

## Standards

Each component contains between 3 and 12 standards with measurable objectives to help you apply the component to nursing practice. Each standard also contains a customizable menu of implementation strategies and measurement options so you can achieve and demonstrate success.

## Why have a professional practice model?

Nursing professional practice models are associated with:

- Better nurse outcomes (increased job satisfaction, reduced turnover)
- Better patient outcomes
- Increased organizational engagement
- Better interdisciplinary collaboration and practice
